SKATEPARK CONSULTATION REPORT.

Skate Facility Design | Conceptual Design And Construction | Contract Administration | Project Management

CONSULTATION REPORT - MALENY, QLD.

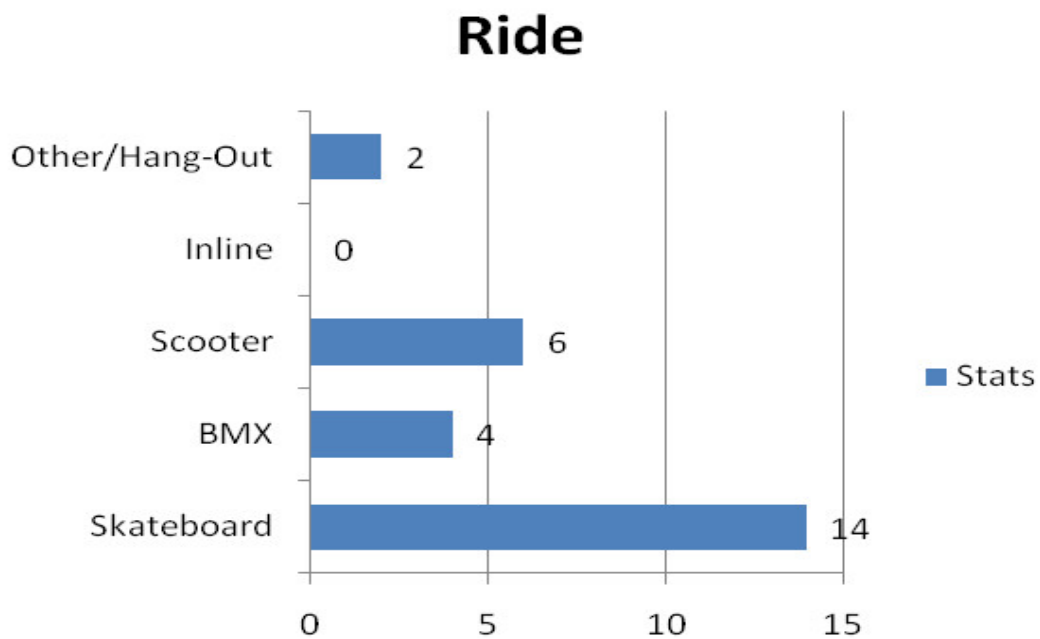

1. Age

The majority of your user group is aged between 15 and 19 years.

2. Ride

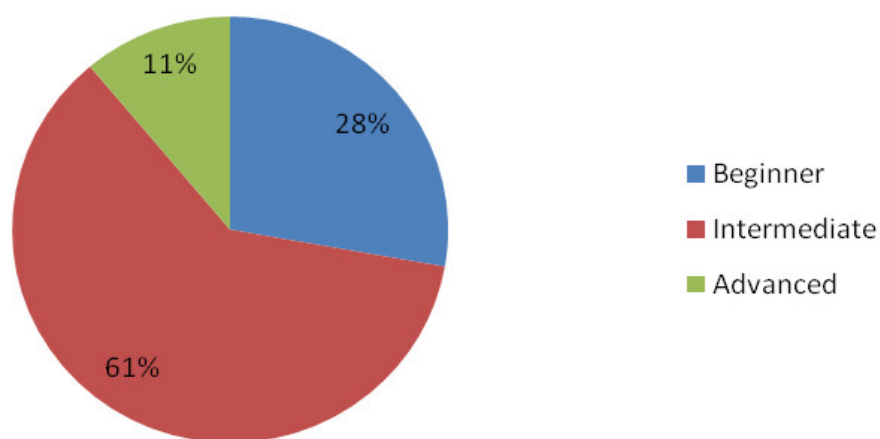

Skateboarding is substantially the most popular sport identified, scooters and BMX also have a presence.

3. Skill Level

As of right now, the far majority of the future users consider themselves to be Intermediate.

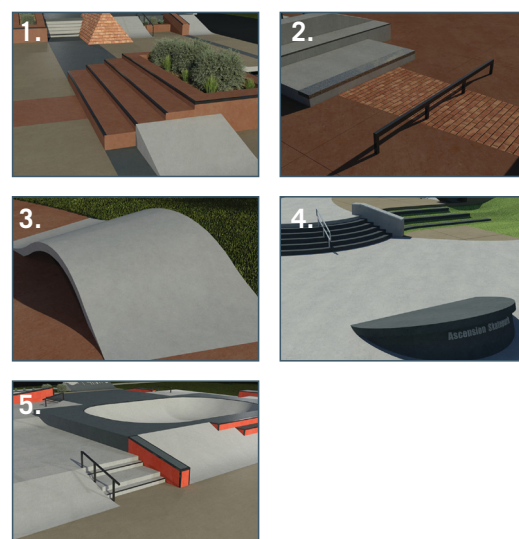

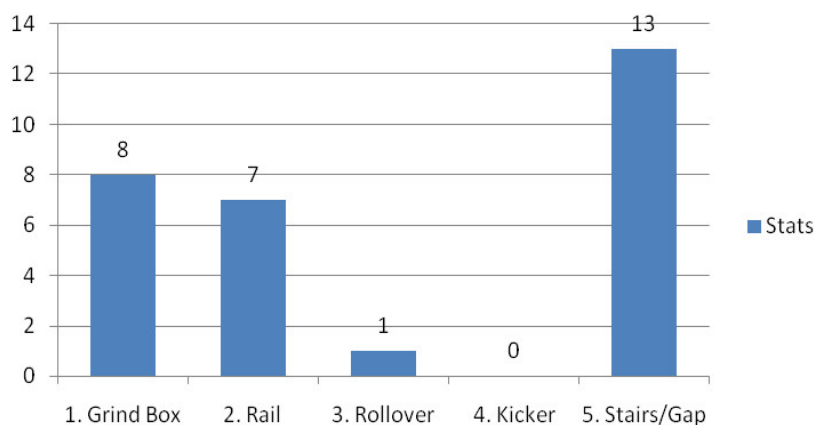

Skill Level

4. Basic Obstacle

From all participants' five choices, Staris/Gaps was basic obstacle by far most voted for. Grind Box and Rail where a close second.

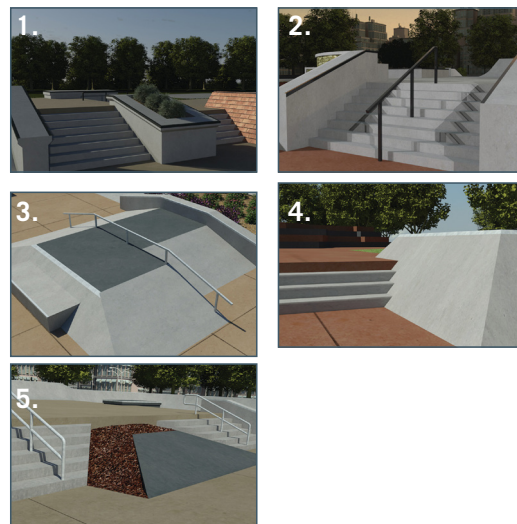

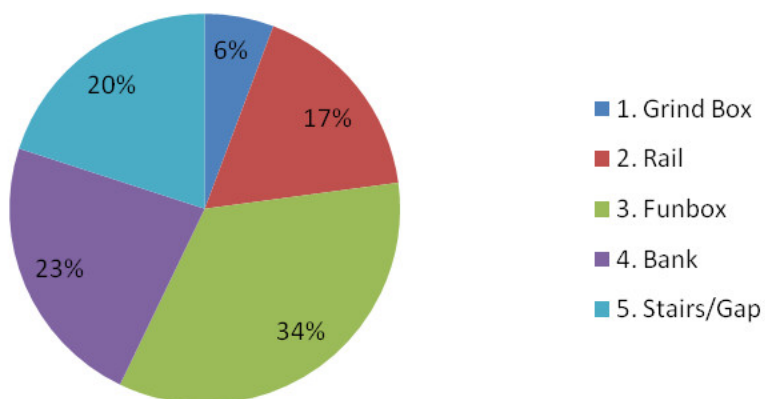

Basic Obstacle

5. Advanced Obstacle

With 34% and 23% there is a clear demand for a funbox and a set of stairs/gap as advanced obstacle.

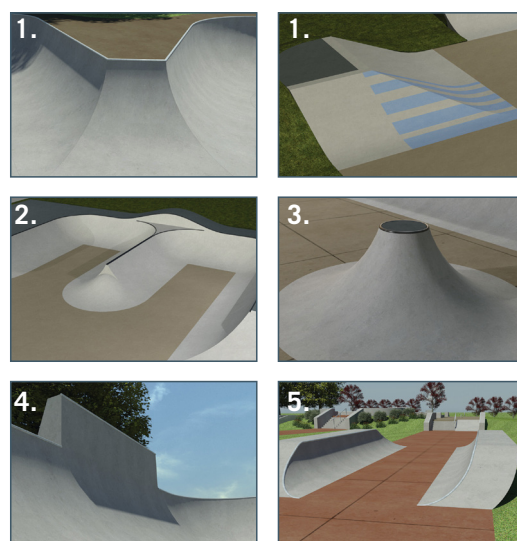

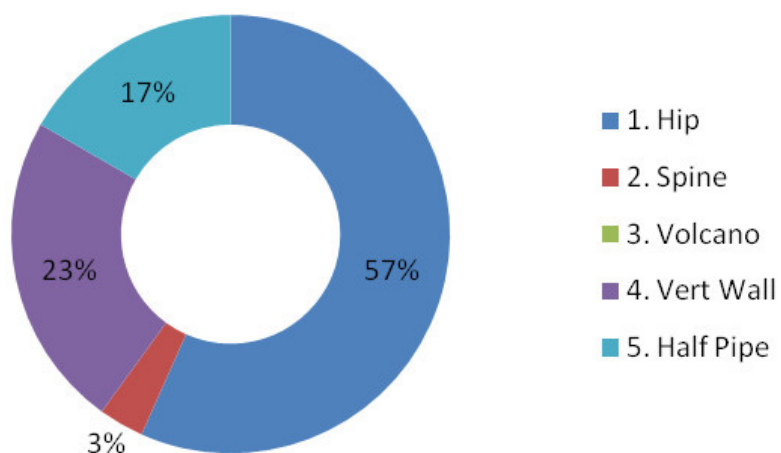

Advanced Obstacle

6. Ramp

With 57% the Hip is the most popular ramp, closely followed by the vert wall (20%).

7. Voices from the Community

Besides what is already expressed through the previous graphs, the community made the following remarks:

- "Maleny Skatepark is a massive part of growing up in the town itself being one of the few attractions for young kids in the area, Having a face lift would make a huge positive impact on the youth of the community"
- "The Street section is lacking in contemporary relevance, the few little obstacles are very mediocre, All round a poorly designed and finished park"
- "Nambour is my favorite park because it's got what you want"
- "Unusable bowl, good seating is needed"
- "Needs Smooth Surface, variation in elements, larger size and more obstacles"
- "Needs Creative Street elements and to be interesting"
- "Needs Basic Rails, Smooth surfaces, MORE stair gutter obstacles"
- "Needs Spines, larger obstacles, more air time for scooters/BMX and Rails"
- "Legit Hubbas, Standard Ledge/Flatbar, Creativity"

8. Community Contact

The following people shared their email addresses and facebook details to stay up to date with the project:

- Zack
- Durack
- Ebony
- Andrew
- Joan
- Patrick
- Madison
- Ben
- Sam
- Aidan
- Lockie
- Joseph
- Torban
- Lochie
- Curtis
- Ted
- Jack

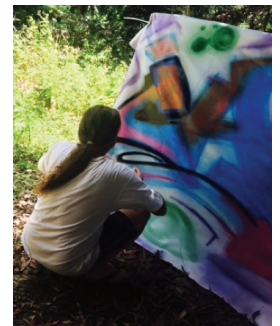

FINAL CONCEPT REPORT - MALENY, QLD.

1. National Youth Week - Skate Park Jam

April 18th 2015 we held with the Maleny Skateboard Community a National Youth Week – Skate Park Jam. The scooter, BMX and Skate Jam event brought the whole extreme wheels sport community together for a day of competition and free riding as the wider community enjoyed the show of all riders showing off their skilled abilities at the current Maleny Skate Facility.

Participants on the day were encouraged to look over the now previous re-development design #9225 displayed next to the registration table and give feedback and final input on the design. Most participants gave it supportive thumbs up and went on to enjoy the festivities. The flowing responses were recorded and have helped shape the revised design #9228.

2. Voices from the Community

The recommendations and remarks given by the community during the Skate Park Jam are listed below. Furthermore an email to all registered Maleny Skate Park Community members and wider community representatives was sent Fri 29/05/2015, titled "NOW CALLING FOR FINAL FEEDBACK - Maleny Skatepark Concept Design" to gain further input on the design, while no further input was given.

- | | |
|-----------|--|
| • Trish | "They need it" |
| • Eli | "Awesome, but needs a box. Thanks for keeping the halfpipe! Maybe replace one of the humps with a box" |
| • Kristy | "Much needed, great setup" |
| • River | "Needs a spine and box and fly out but looks amazing" |
| • Gumald | "Looks great" |
| • Ryan | "Needs a box" |
| • Jackson | "The vert wall looks to big" |
| • Ben | "Leave it" |
| • Kyle | "Use old plan" still good" |
| • Zaden | "Better than the one we have because it is really rough, New one will be better to skate on for more tricks" |

FINAL CONCEPT REPORT - MALENY, QLD.

3. Final Design Revision

The small changes to the design as informed by community feedback are as such:

1. A lot of the old features have been included in the final concept design #9228 as most feedback stated that design #9225 was suitable and very desirable to ride.
2. The three humps have been transformed into a hump/box obstacle which will complement well the short distances between the vert wall and street set.
3. The vert wall has been reduced to 2.5m height and now is in better proportion to the scale of the skate park footprint.

4. Conclusion

Trinity Skate Parks is proud to present to the Sunshine Coast Council and the Maleny Skate Park Community the Final Concept Design #9228 for the proposed re-development of the current Maleny Skate Facility.

All promotional documentation for media release content has been made available to the client (Sunshine Cost Council) and with the client's permission can be forward onto the Maleny Skate Park Committee to proceed with fundraising required for Construction documentation and Construction.
